8:54 AM

We are going to make a mailbox on the iPhone to manage our Chapter Email along with our other email.

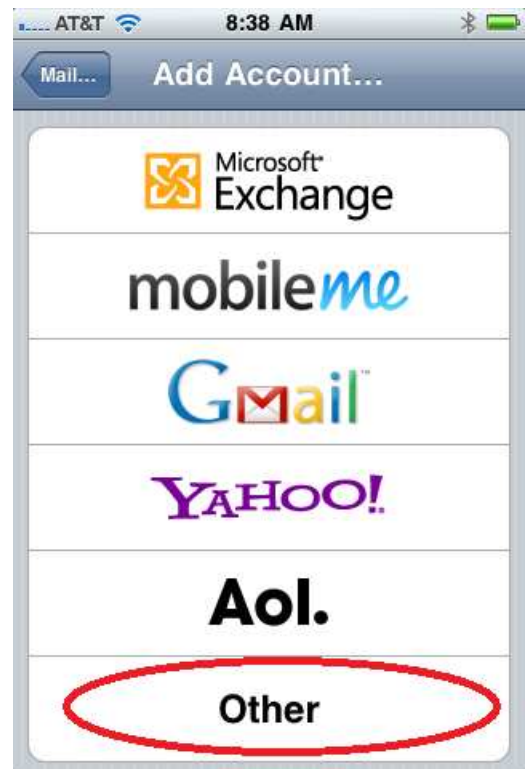

Go to the Settings app and touch Mail, Contacts...

Touch Add Account...

Touch Other

Touch Add Mail Account

Type in your account information:

Name Chapter title (or what ever you want for a Name)

Address Chapter Email address

Password Your Zimbra password

Description The Description is auto filled. Press Return to move to the Description back space and type what ever you want

Then touch Next when done

Make sure IMAP is selected and the your Name, Email Address, and Description are correct.

Touch Next

Host Name Your chapter Zimbra Domain Name

User Name Your chapter email address

Password Your Zimbra password

Touch Next

Host Name Your chapter Zimbra Domain Name

Even though it says Optional you must enter:

User Name Your chapter email address

Password Your Zimbra password

Touch Next and you will see Verifying...then check marks next to each item verified.

Once all the information is verified the Accounts screen will be displayed.

Touch the Email account you just created.

Scroll down and touch Advanced

Touch Remove

Select Never

Touch Advance to go back

Scroll down

Touch Off to turn SSL Off

Change the Server Port to 143

Touch the Account Name to go back

Touch Done

Touch the Mail App on your iPhone

You should be able to maintain you Chapter email from your iPhone
